

# Managed Wireless Security Service

## Managing Risk & Reducing Total Cost of Ownership

### Wireless Monitoring & Protection

Pentura's Managed Wireless Security Service, using AirDefense combines on-site specialist support and remote management of wireless security services with 24x7 real-time monitoring, protection, escalation and response processes to minimise the threat of external penetration into corporate networks.

You can centrally monitor and manage the entire WLAN without re-training or hiring additional Wireless experts or simply police a no-wireless policy across multiple sites.

**AirSweeper** is a unique service offering from Pentura Ltd which tackles the increasing challenges surrounding day to day management of monitoring wireless networks by utilising technology advancements now available with AirDefense.

**AirSweeper** can deliver comprehensive identification and analysis of security events that require immediate action preventing costly downtime and potential loss of revenue.

Whether we are managing new or existing infrastructure, our trained and experienced IT security analysts implement policies and build a service agreement tailored to your specific business requirements.
